This register identifies interested parties relevant to the ISMS (Clause 4.2) and the security-related requirements each party has. These requirements, together with the organizational context in ISMS-Scope.md, inform the risk categories assessed in 09-ISO27001-Risk-Assessment.

Interested Party	Requirement	Type
Enterprise Customers	Protection of customer data; security assurance through contractual requirements and security assessments	Contractual
Regulators	Compliance with applicable information security and data protection obligations	Legal/Regulatory
Employees	Secure and appropriate access based on job responsibilities	Internal
AWS (Infrastructure Provider)	Understanding shared responsibility requirements for cloud security	Contractual
Company Leadership	Visibility into security risks, ISMS performance, and improvement priorities	Internal
